Implementation Management Services is a value-adding service comprised of highly skilled Lumen Program and Project Managers owning the end-to-end delivery of unique business value realization and success criteria in the implementation of large, multi-technology implementations.

Realize business success

- Integrating disparate technology and teams for large scale, multi-technology solutions to simplify the complexity, mitigate the risks, and future proof your investments.

Enhanced user experience and productivity

- Helping you to ensure the technology implementation is successful and operates according to the success criteria with the end users in mind.

Maximize competitiveness

- Obtain value from your technology fast and avoid reworks

Common Use Cases

- Streamline your store location expansion projects
- Define aggressive plans for data center expansion and high-performance networking
- Modernize infrastructure with standard deployment plans

Why Lumen?

Lumen is positioned to deliver on your success criteria and business outcomes with high-performance technology and rigorously trained project and program managers certified by globally recognized standards from the Project Management Institute to streamline your implementation.
